

## 8.2 Setup (Windows 7 & Vista)

In order to install version 8.2 we must first turn off your user account control. This can be turned back on after the install.

1. Click your "Start" button and then click on your "Control Panel" icon.

2. Click on the "User Accounts" icon.

3. Now select "Change User Account Control Settings."

### Make changes to your user account

Change your password  
Remove your password  
Change your picture  
Change your account name  
Change your account type  
Manage another account  
**Change User Account Control settings**

4. Change your notifications to "Never Notify" and click "OK." You will be prompted to restart your computer. Be sure to do so at this time.

### Choose when to be notified about changes to your computer

User Account Control helps prevent potentially harmful programs from making changes to your computer.

[Tell me more about User Account Control settings](#)

Always notify

Never notify

**Never notify me when:**

- Programs try to install software or make changes to my computer
- I make changes to Windows settings

**i** Not recommended. Choose this only if you need to use programs that are not certified for Windows 7 because they do not support User Account Control.

OK Cancel

5. After your computer has been restarted, you are ready to install version 8.2.0 and higher.
