

Installation Instructions

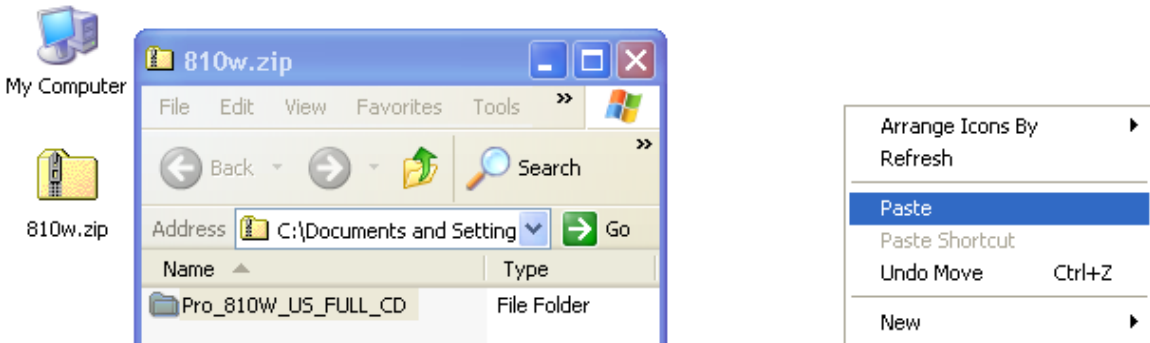

1. Right click on the “zip” file and select “Open with...Compressed (Zip) Folders

2. Next, right click and select “copy” on the available folder.

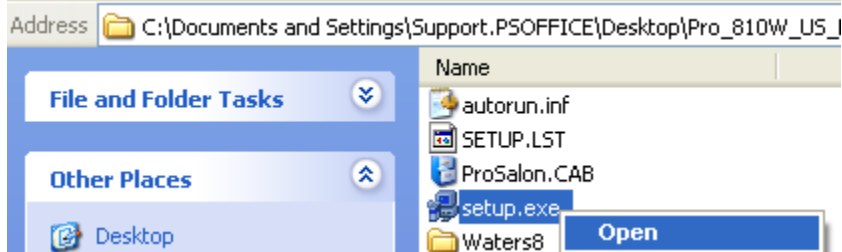

3. Next, right click on any blank part of your desktop and left click on “paste.”

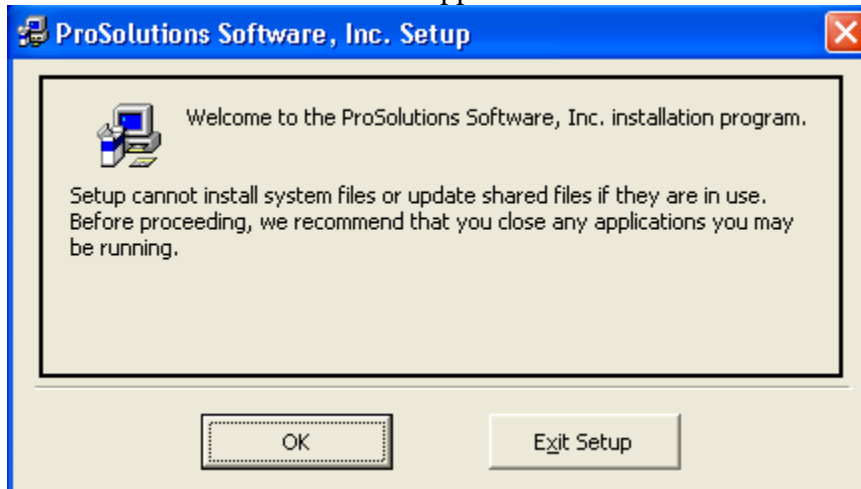

- Next, right click on the folder you just pasted on to your desktop and select “Open.”

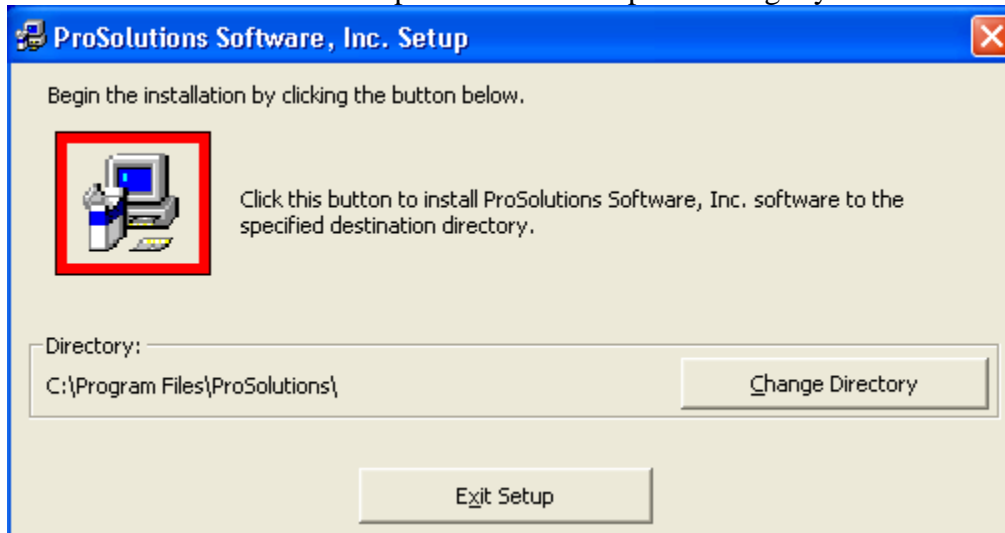

- Next, right click on the file “Setup.exe” and select “Open.”

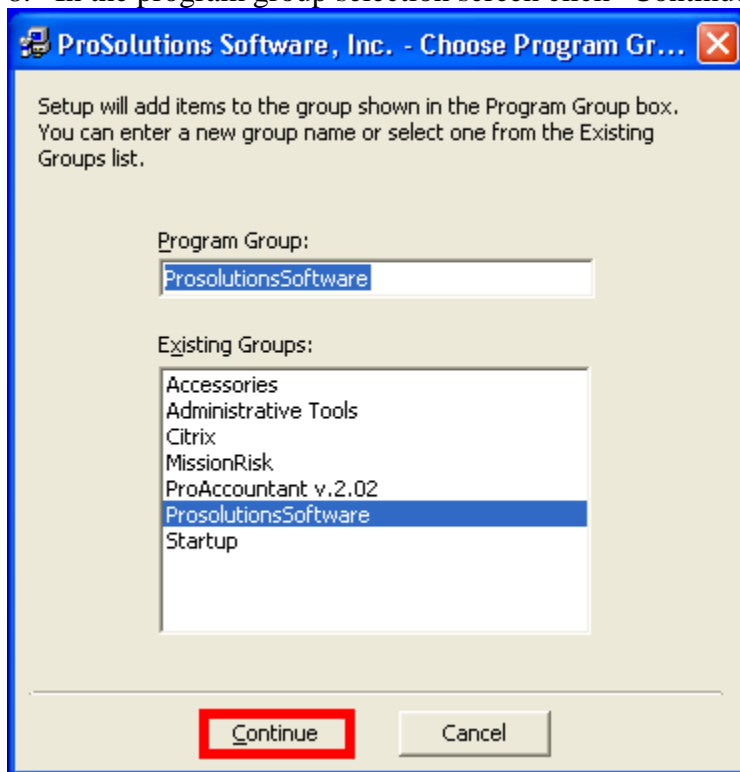

- When the installation screen appears click “OK.”

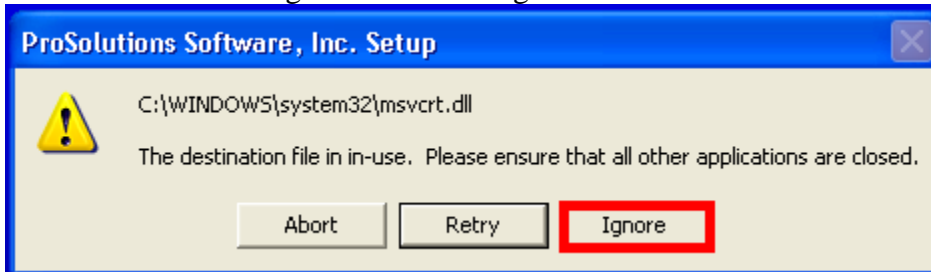

7. If you need to change the installation directory click the “Change Directory” button otherwise click the picture of the computer to begin your installation.

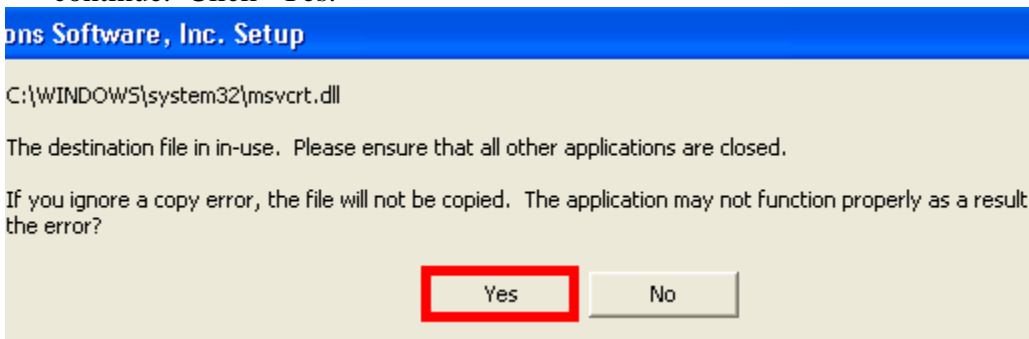

8. In the program group selection screen click “Continue.”

9. If you receive any messages stating that a “dll” file is in use simply click “Ignore.” Please note that this step is ONLY for files ending in “.dll.” If you receive this message for a file ending in “.ocx” do not continue.

10. The next message you will receive is a message asking if you are sure you want to continue. Click “Yes.”

11. Installation is complete, click “OK.”
